**Print Release Station** is print management software, best-suited ultimate print control solution for libraries/schools/colleges/universities of low budget, where print jobs hold and release is centralized and unwanted print is restricted.

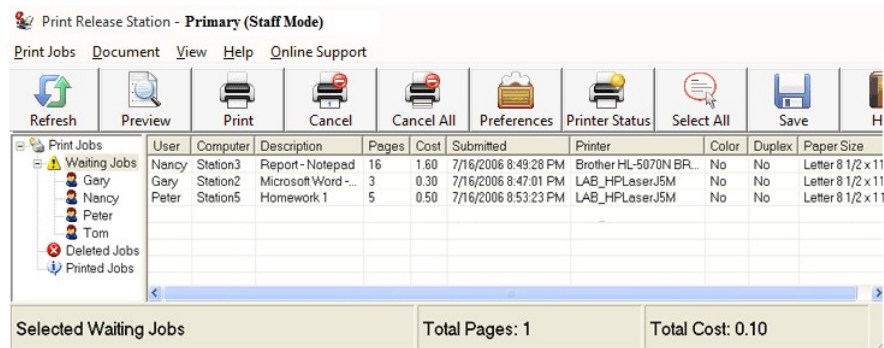

## HOLD / RELEASE

**Print Release Station** keeps print jobs on hold until released manually by student, patron, staff or employee. The simple interface provided by the software supports staff operation (staff mode) and unattended user operation (user mode).

## USER MODE

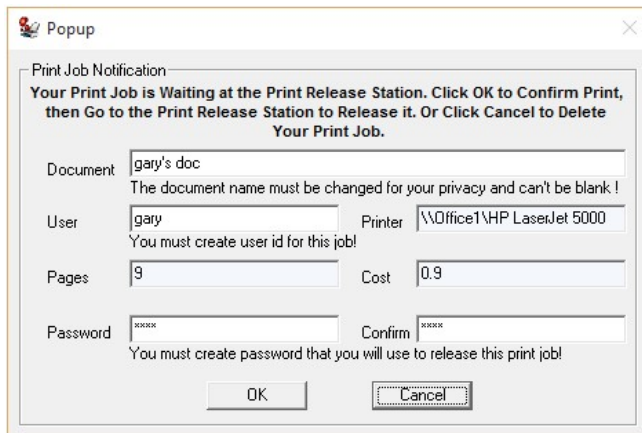

**Print Release Station** provides different ways for users to release their print jobs:

- ✓ Enter user ID to show and release the print jobs.
- ✓ Enter prepaid account to release the print jobs.
- ✓ Enter AD credentials to release the print jobs.
- ✓ Use self-payment equipment to release the print jobs.

## SECURE PRINTING

**Print Release Station** allows users to create user id/password just from their computers that they will use to release their print jobs on the Print Release Station.

## FOLLOW ME PRINTING

**Print Release Station** allows users to release their print jobs to any printer any location.

## REPORT

**Print Release Station** provides a reporting tool allowing you to generate 100 reports for your print cost analysis and client billing.
