

CZ Print Watermark / Header / Footer – User Guide

With CZ Print Watermark / Header / Footer 1.0, you can easily insert a user name, computer name, day, time and page count to appear on footer or header area of printed document from all your applications. You can also create overlay's and multi-line watermarks and texts on each paper sheet. CZ Print Watermark / Header / Footer 1.0 lets you control the raw power of your printer and channelize it for better printing needs.

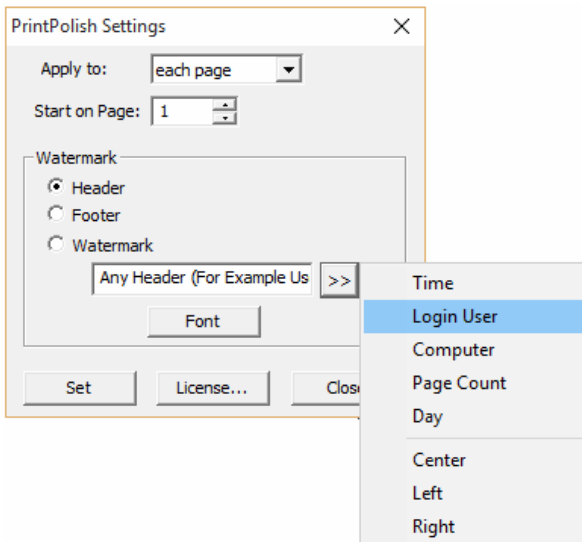

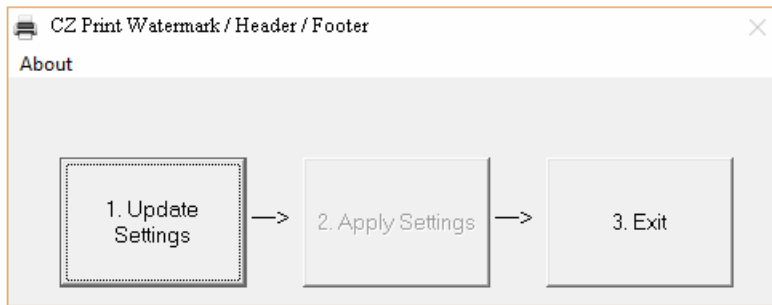

System Requirements

Operating System Windows (32-bit and 64-bit)

Hard Disk Free Space 10M

In order to install CZ Print Watermark / Header / Footer, you must have the administrator rights on the installation computer.

1. Double-click Setup-for-Windows-32-bit.exe (for Windows 32-bit Operating System) or Setup-for-Windows-64-bit.exe (for Windows 64-bit Operating System) and follow the on-screen instructions.
2. Click "Start → All Programs → CZ Solution → CZ Print Watermark-Header-Footer Settings".
3. Click "Update Settings" to modify settings. Click "Apply Settings". The settings are saved in the file config.ini in the installation folder of CZ Print Watermark / Header / Footer e.g. C:\Program Files (x86)\CZ Solution\CZ Print Watermark-Header-Footer 64-bit\config.ini. Click button "Exit" to exit.

4. Print a document to test.

Easy to Use Print Management Solutions for Business and Education

CZ Solution offers print management solutions for small, medium and large businesses, government, libraries, non-profit organizations, schools and other institutions. With the help of CZ Solution, managers and business owners can take control of printing and copying to save money and more effectively utilize resources.

CZ Print Job Tracker 8.0 This software is designed to help businesses and educational institutions of any size centralize print management. It allows you to control, track, and audit print usage as well as set quotas to reduce printing costs. You can also use it to scan your network and collect printer inventory information including counter, Ink / toner usage, IP address, model, serial number, MAC address.

- Print Counting & Tracking & Accounting
- Print Control & Quotas & Authentication (by PIN) & Rules
- Client Billing by Entering Client Code & Project Code & Job Code
- Printer Status Monitor (Toner Low, Out of Paper...)
- Scan Network to Collect Printer Counter, Ink / Toner Usage, Model, Serial Number and MAC address.
- Save & Archive & View All Printed Documents
- Detail Usage Report by User, Department and Printer

CZ Print Release Station 6.0 For libraries, schools and other institutions with low budgets, the release station allows control over costs by charging fees for each copy. This is an ideal way to have patrons or students pay for their own printing and easily manage the release of documents. Charging for copies prevents wasteful use of resources and helps libraries and schools pay for their printing equipment.

- Automated Hold, Manual Release Print Jobs
- Pay For Printing by Cash-in-Hand Payment, Coins, Cards, Bill or Prepaid
- Pay for Copying by Coins, Cards, Bill or Prepaid
- Secure Printing (by PIN)

CZ Copier Tracking System 2.0 This powerful copy manager and counter simplifies the tracking and administration of copies over an entire network or system. Users can enter a PIN in order to access the copy machine or MFP and administrators can keep track of amounts, issue quotas or even make exceptions for large copy jobs. This system helps businesses reduce copy costs across the entire organization.

- Copy Counting & Tracking & Accounting
- CCopy Control & Quotas & Authentication (by PIN) & Rules
- Client Billing by Entering Code
- Charge Back
- Detail Usage Report by Copier (or MFC)

CZ Print Polish Marker 1.0 This handy tool prints user names, computer time and date on the header or footer of any document from all applications and users can identify their own documents.

Note: You can open config.ini e.g. C:\Program Files (x86)\CZ Solution\CZ Print Watermark / Header / Footer 64-bit\config.ini to update the parameters directly, then save the file and print a document to test. You can also copy the config.ini to other computers, so you don't need to setup the parameters manually on every computer.
